SUBJECT

Network

tron

Seed address

TMqgVELUb5BxvA8LgMJnsQQWMg33Psvfqz

Seed event

```
tron:541fe0b42ce36b1258af4abb597caef6e0dedee1cf93cebf595abc032f807744:0
```

Asset

USDT (contract TR7NHqjeKQxGTCi8q8ZY4pL8otSzgjlj6t, 6 decimals)

Case-flow linkage

established

ANALYSIS SCOPE

Data mode

RECORDED_PUBLIC

Analysis cutoff

2026-08-10T15:59:54+00:00

Run window

2026-09-26T10:38:14.255253+00:00 → 2026-09-26T10:38:14.263550+00:00

Coverage

```
complete_within_scope
```

Budget use

3/8 hops · 27/5000 events · 26/400 traversal requests · 0.008s

Traversal requests count only the tracer's own forward-walk pages, not the seed-event search, enrichment, or receipt verification a live run also performs – see the bundle manifest's `provider_exchanges` for the total acquisition count.

Coverage is complete *within the declared scope* – this network, this asset, this time window, these budgets. It never means complete knowledge of the blockchain.

Hop 0 is the seed transfer that links the case to the path; it is shown from the run's own saved event, not re-derived. Later rows are onward transfers observed within the analysed scope.

A **known_service** ending is supported by a reviewed, in-date service-control assertion. A **deposit_candidate** is a lead: it is shown, and tracing continues past it. Neither identifies a person.

LABEL PROVENANCE

ENTITY	ADDRESS	SOURCE	RETRIEVED	METHOD	LOG	VALIDITY	LAST VERIFIED	ACCEPTED BY	SOURCE HASH
OKX	TYfxtkCooUX7rzjRqBGLan9XkCqxqrCRir	https://www.okx.com/zh-cn/claim/12-026-08-10T15:59:54+00:00	2026-08-10T15:59:54+00:00	→	2026-09-20T07:51:29.439220+00:00	2026-09-20T07:51:29.439220+00:00	2026-08-10T15:59:54+00:00	2026-09-20T07:51:29.439220+00:00	section=address=7db12d643664e

Every claim above is reproduced from the label set as it stood at 2026-09-26T10:38:14.255253+00:00, not read from today's files. The source hash identifies the document the claim came from; the accepting reviewer and the decision date identify the row in review_log.csv.

Label sets read

FILE	CLAIMS LOADED	WITHDRAWN BY REVIEW	SHA-256
verified_anchors.csv	2	0	c2018baa8f2ea17873877375c66
deposit_candidates.csv	1	0	d133e906be0c66ee184a4798376

Label source **reviewed_sets**, 2 accepted service claim(s) available to this run. A withdrawn row is one a reviewer rejected or quarantined; it was not loaded.

LIMITATIONS AND UNRESOLVED ITEMS

CODE	DETAIL	ADDRESS	EVENT
snapshot_only_label	OKX's claim over TYfxtkCooUX7rzjRqBGLan9XkCqxqrCRir is scoped to a single instant (2026-08-10T15:59:54+00:00), not a period of continuing control.	TYfxtkCooUX7rzjRqBGLan9XkCqxqrCRir	
address_role_unknown	TYfxtkCooUX7rzjRqBGLan9XkCqxqrCRir role under OKX is not established beyond service control -- not confirmed as a customer deposit address, hot wallet, or cold reserve.	TYfxtkCooUX7rzjRqBGLan9XkCqxqrCRir	

CODE	DETAIL	ADDRESS	EVENT
allocation_unknown	The observed amount is the transfer's own value, not an allocation to any specific case or claimant. An observed path is a sequence of transfers, not ownership of fungible units.	—	—
bounded_analysis_window	Analysed 2026-08-10T15:41:27+00:00 to 2026-08-10T15:59:54+00:00 only -- not the account's full history before or after it.	—	—
single_validation_case	One public-chain validation case, chosen to demonstrate the pipeline end to end. Not a general coverage claim about this address, this entity, or TRON activity broadly.	—	—

Read this before relying on the page above.

An observed path establishes a sequence of transfers, not ownership of fungible units. Case-associated amounts default to allocation_unknown. This output does not identify a person, establish guilt, or authorise a freeze.

Observed transfer amounts are what the chain shows. A case-associated amount is a separate question and defaults to allocation_unknown: an address holding pre-existing funds mixes them, and a later outgoing transfer cannot be assumed to consist of the funds under investigation.

This document is investigative material for human review. It is not a legal instrument, it establishes no authority to restrict any account, and it has not been checked by anyone merely because it was generated.
